

Intervention & Early Identification

Before a problem can be addressed, it must be first diagnosed. It can be a challenge to navigate through services and resources. Physicians and clinicians can be a big help during the process.

ATTENTION PHYSICIANS! ARE YOU UTILIZING SBIRT?

Screening, Brief Intervention, and Referral to Treatment (SBIRT)

SBIRT is an evidence-based, integrated, public health approach to the delivery of early intervention and treatment services for persons with substance use disorders as well as those who are at risk of developing substance use disorders. SBIRT requires screening of every patient for potential alcohol or other drug problems and a response which reinforces non-harmful use, educates about the impact of substance misuse on overall health and safety, and supports patients with problematic use in accessing further assessment, diagnosis, and treatment. New Hampshire has several initiatives in place to expand SBIRT in Primary Care settings and Community Health Centers.
