

Substance Support Service Navigator for the South Central Region

Updated September
2021

What is The South Central Public Health Network?

The South Central NH Public Health Network (SCPHN) is a collaborative of partner agencies that are working to enhance and improve community health and public health services across the region. Public Health is the practice of preventing disease and promoting good health within our communities. Public health is **YOUR HEALTH**. It embodies everything from clean air to safe food and water, as well as access to health care and safe communities.

Through public health planning and initiatives, people get sick less frequently, children have the opportunity to grow into healthy adults, individuals make healthier and safer choices and the community is better prepared to respond to crises and recover from them.

The South Central Public Health Network and its core subcontractors look forward to working with partner agencies and our communities across many sectors to develop strategies and solutions that will respond to your needs in a methodical and informed way.

Our vision is to become the healthiest and safest communities in New Hampshire by identifying public health priorities and developing solutions to improve community health and safety.

Towns: Atkinson, Chester, Danville, Derry, Hampstead, Londonderry, Plaistow, Sandown, Salem & Windham

Purpose of The Navigator:

We encourage you to reach out and get help! The purpose of this resource navigator is to shed light on the services available in the South Central region. A part of the network is the Continuum of Care for substance use disorders. The Continuum of Care scope of work includes prevention, early intervention and identification, treatment, and recovery resource identification. We hope that you use this guide to locate services in order to fit your needs, no matter where in the continuum you fall.

For more information on this resource guide or to add your agency please contact:
katemacdonald@catsnh.org.

Disclaimer: The information provided in this guide is for informational purposes only and is not an endorsement of any organization or service. While we will make every effort to keep the information up to date and correct, we make no representations or warranties of any kind, expressed or implied, about the completeness, accuracy, reliability, suitability or availability of any of the organizations or providers listed herein or the information, products, services or related graphics contained in the guide for any purpose.

IN CASE OF EMERGENCY, DIAL 911 FOR IMMEDIATE POLICE OR FIRE DEPARTMENT RESPONSE.

If you need other IMMEDIATE ATTENTION:

Dial 988 Suicide and Crisis Lifeline <https://988lifeline.org/>

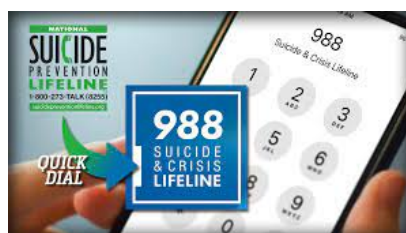

The Lifeline provides 24/7, free and confidential support for people in distress, prevention and crisis resources for you or your loved ones, and best practices for professionals in the United States.

Dial 2-1-1 www.211nh.org/

2-1-1 is an easy to remember telephone number that connects callers, at no cost, to information about critical health and human services available in their community.

ATTENTION PHYSICIANS! ARE YOU UTILIZING SBIRT?

Screening, Brief Intervention, and
Referral to Treatment (SBIRT)

SBIRT is an evidence-based, integrated, public health approach to the delivery of early intervention and treatment services for persons with substance use disorder, as well as those who are at risk of developing substance use disorder. SBIRT requires screening of every patient for potential alcohol or other drug problems and a response which reinforces non-harmful use, educates about the impact of substance misuse on overall health and safety, and supports patients with problematic use in accessing further assessment, diagnosis, and treatment. New Hampshire has several initiatives in place to expand SBIRT in Primary Care settings and Community Health Centers.

TREATMENT/RECOVERY

These services exist for those that are ready to seek help. There are two main types of treatment programs; inpatient and outpatient. Inpatient is being admitted into a hospital or facility to be closely monitored. Outpatient treatment can include individual and/or group counseling but allows the person to remain at home and still work or attend school.
